

## **Cohesive Poly-Paper Laminates**

*Unique packaging material that provides the strength and rigidity of paper with the tear and water resistance of film!*

## **Pack & Guard™ Cohesive Poly/Paper**

For years, we have had cohesive coated films and papers, finally we married the 2 substrates into one product – a cohesive poly laminated paper! What came of this experimentation is a very unique and highly functional product that provides the strength and rigidity of paper with the moisture and tear resistance of film, all in a sharp looking package. Cohesive poly/paper is excellent for printed applications, as it's composition will display your artwork and logos beautifully, giving you or your customer's packages that high-end look. Cohesive poly paper can provide the same look, feel and tear resistance as Tyvek® bags. Add your artwork or graphics and this is one cold seal package that will stand out from the crowd. Contact us today for samples!
